

Scientific Calculator

This app “Scientific Calculator” is an Advanced Calculator which can be used for mathematical calculations, solving equations, finding interest, etc.

The “Calculator” option is basically designed to help the students of any stream and any branch to do basic and advanced mathematical calculations faster.

The “Interest Calculator” option is designed to help to calculate Simple and Compound Interest for a given principle, rate and a certain period of time.

The difference between the Simple and Compound Interest can also be obtained through this app.

Unit Converter

This app “Unit Converter” is basically designed to help the students of any stream and any branch to convert from one unit to another unit faster.

Science Reference

This app “Science Reference” is basically designed to help the students of science for referring to the various formulas of chemistry and physics. The App can also be used to refer to the various physics and chemistry constants.

Videos, animations and web links are made available for some formulas.

Periodic Table

This app “Periodic Table” is basically designed to help the students of science for referring to the various element’s details. The App can be used to learn the elements, see the tabular form of periodic table and search the elements by their name, # or symbol. Voice search is also available in the app.
